

# FAHAD BIN HASHIM

**Location:** Kottayam, Kerala, India **Phone:** +91 9744536101 **Email:** fahadbinhashim03@gmail.com

**LinkedIn:** linkedin.com/in/fahadbinhashim **GitHub:** github.com/Fahadbinhashim2005

## Professional Summary

Computer Science Engineering student with practical exposure to Full Stack Development and Machine Learning through internships and academic projects. Interested in building real-world software solutions with a focus on AI/ML and modern web technologies. Comfortable working with Python, frontend development, and data analysis tools, while continuously exploring new technologies and improving technical skills.

## Education

### B.Tech in Computer Science Engineering

Saintgits College of Engineering (Autonomous), Kottayam, Kerala

2023 – 2027 (Expected)

CGPA: 7.22 / 10.0 (upto S4)

### Higher Secondary Education (Class XII)

Amaravathy Higher Secondary School, Kumily, Kerala

2023

Board: State Percentage: 94.83%

### Secondary Education (Class X)

St. Pius X English Medium School, Kuttikanam, Kerala

2021

Board: ICSE Percentage: 91.8%

## Experience

### Full Stack Development Intern – JYESTA Corporate Entity

Sep 2025 – Nov 2025 (3 mos)

- Worked on frontend development tasks using HTML, CSS, and JavaScript in a collaborative environment.
- Contributed to responsive UI development and learned practical workflow practices followed in real projects.
- Improved understanding of modern web development concepts through hands-on project experience.

### Data Science & Machine Learning Intern – TECHMAGHI, Kochi (Hybrid)

Jun 2025 (1 mo)

- Explored core concepts of Data Science and Machine Learning through guided practical sessions.
- Performed basic data preprocessing and visualization using Python libraries and real datasets.
- Worked with tools such as NumPy, Pandas, and Scikit-learn to understand ML workflows and analysis techniques.

## Projects

### Dysarthric Speech Recognition using ML | github.com/Fahadbinhashim2005/mini-project-site

2025 – 2026

- Worked as part of a team on a machine learning project focused on improving speech intelligibility for dysarthric speakers.
- Handled audio preprocessing and feature extraction using Python libraries including Librosa and NumPy.
- Contributed to model training and frontend development for presenting project outputs in a user-friendly way.

### Dessert Shop Website – Farsi Laban | github.com/Fahadbinhashim2005/Farsi-Laban-Website (In Progress)

2025 – Present

- Currently developing a responsive website for a local dessert shop based in Kottayam.
- Designed modern UI sections including product displays, landing pages, and contact sections using HTML, CSS, and JavaScript.
- Focused on clean design, responsiveness, and smooth user experience across devices.

## Technical Skills

**Programming Languages** Python, C, Java, JavaScript

**Web Development** HTML5, CSS3, JavaScript, Responsive Design

**ML & Data Analytics** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Librosa

**Database** MySQL

**Tools & Platforms** Git, GitHub, VS Code, Canva, Photoshop, After Effects, Overleaf, Google Colab

## Certifications

**HTML Certification** – Infosys Springboard

2024

**Python Programming** – SWAYAM-NPTEL

2024

**Introduction to Machine Learning** – SWAYAM-NPTEL

2024

## Activities, Interests & Languages

**Interests** AI/ML Applications, Web Development, Arduino-based Experiments, Product Design, Creative Media & Visual Effects

**Languages** English (Professional) Malayalam (Native) Hindi (Conversational)
